

Contents

- 7 Introduction
- 11 Abbreviations and Acronyms
- 29 Publications: A. Journal Articles
- 139 Publications: B. *Miscellanea* and monographs

As the field of environmental toxicology has expanded rapidly over the past two decades, it has become increasingly difficult to keep up with the literature. This is particularly true for students, teachers, and scholars specialized in environmental toxicology who need to keep up with the latest information on a fluctuating number of relevant publications.

The present volume is designed to help overcome this problem. It contains a comprehensive listing of all the relevant publications in environmental toxicology, including journal articles, books, book chapters, and Miscellaneous items.
